

INJECTION MOULDS

Category: Machinery

Subcategory: General Industrial Equipment

Exporter: [ACCURATE EDGE PRECISION EQUIPMENT IND. LLC](#)

HS Code:

Product Description:

AE designs and manufactures multi-cavity moulds using high grade heat treated steels. Fast cycle times enable high productivity of moulds. Optimized runners or incorporated hot runners in the moulds minimize wastage of high grade raw material. Excellent design and manufacturing practices lead to high mould life. Though our moulds match global standards they are highly competitively priced to offer you considerable cost effective advantages.

With core capability in designing and manufacturing moulds to world class standards, AE can provide full system solutions. It specializes in high precision, multi- cavity, small, medium and large size moulds capable of running on injection molding machines up to 3200 tonnes
